Whig and Courier

but typhold fover and other diseases.

In the absence of a much needed, systematic supervision of this matter by the General Government a grave responsibility rests upon State and local subcrities. Especially at ports engaged in foreign commerce, vigitince should beloconstant and action prompt, when required if the choice a should be allowed to effect a landing, the soil and the water may be contained and the "stamping out" of the disease made impossible. SPECIAL BLEES

SPECIAL BILLS

1 Experience has abundantly proved that a town or district with a tiean soil, pure air and pure water, may bid defiance to choica. Therefore the rule is imperiative to search for and abateful filte-hulsances. Remove all decomposing animal and vegetable substances. Empty all privy waits, and deroth them with the solution of Sulphatero I ron (copperss). Treat all creas-pools and shik drains in the same way. Venditate rooms and keep the collar dry and well ventilated. He sure there is no filthy soakage into the well or other water supply.

Auptis Subage the state preliminary diar shapits.

2 Never neglect the preliminary diar thosa. During this first-stage the discusse is usually turnible.

3 If possible hurn all discharges coming from the patient; as well at all solled cloths of other articles which are not too valuable.

In ther facts in relation to the extersion of clother in these Privy valta, test pools shak grains, heaps of manner, filth sodden orth in 1 other unclein place, and continuing the poison, which, by bother cathed home be mixed with the cholera germ may report a currer of danger for some filth sold on the poison, which, by bother cathed home be mixed with the solt range of a sole lating if solied with the cholera germ may report a currer of a lating with the cholera germ may report a currer of the poison, which, by bother cathed home be mixed with the mark of the poison, which, by bother cathed home be mixed with the solt range of a sole lating if solied with the cholera germ may carry the disagns long distance. During the coldent of 1873 clathing pecked up in Holland Sweden and the rate which are not period in the wild with the cholera geld distance on the way but as inted cholera epidenic on the way but as not cholera epidenic on the way to the fact that cholera comes not from a waylong the proposed of hist is a solid with the solid point lating with the cholera germ in the proposed of hist via the content of the window mean the fact that cholera epidenic on the way formers of the atmosphers but that it comes as explained above, in accordance with certain laws which are now well-and destond. Remainstering this, all unhead and the content in the fact of the content in the fact of the content in the fact of the content in the

hing on a chair near his head.
